Miss Gertrude Mutton played the opening numbers. "Garden in the Rain." by DeBussy, and "Romance." by Schutt. In the second part of the program she gave a group of four numbers. Miss Mutton is one of the most highly trained planists that the college has had in many years. She spent some years abroad, finishing in Germany, and appeared before audiences of German critics, who are admittedly both competent and exacting, and received a good measure of praise from them in a public way. There is both strength and spirit in her playing; idealism in every line, and a high

Mr. Paul Lawless furnished the vocal numbers for the program. All his numbers were in English. He assumes that English speaking people prefer to hear their own language in the concert hail. His choice of numbers was highly pleasing to his audience. Mr. Lawless is a Kansas City man, who has studied in Europe and under well known masters in this country. He sings with ease, and his handling of the embellished measures is pleasing. His numbers were:

New York, Oct. 18 .- Those \$3 shoes you saw in the window today will be marked \$4 to \$6 before spring, dealers here said today. The price of shoes has increased 116 per cent since the beginning of the war in 1914, they assert. Women's fancy shoes of white kid and gray buckskin will advance more rapidly than men's shoes, the dealers believe. They do not consider the increases entirely justified, saying the cost of shoe buttons and cloth shoe straps and parts of shoes like that have merely risen in sympathy with the leather prices.

her hem soldiers is the real answer behind the rising price of footwear in this country, the department of commerce said today. Because the United States has such a wast demand for men in the trenches and as leather, imports have dropped, the prices here rise consequently it was said.

Leather exported in 1914 was valued at \$57,000,000,000 but this amount had jumped of \$145,000,000 in the year ending last June.

Italy is a new leather customer, taking \$14,000,000 worth in 1915.

Aside from leather, the United States shipped more than 20,000,000 pairs of shoes to soldiers this year—better than double the 1914 figures. In addition to the soldiers, there is another element—the Chinese are using shoes instead of sandais. Their bustness has tripled in the past year.
